BP-9-SP

The BP-9-SP is an affordable self-propelled 230 volt single phase blast cleaning system designed for small to medium size jobs as well as being a complimentary unit on larger jobs for doing edges and hard to reach areas. The BP-9-SP is used to prepare concrete surfaces prior to the application of paint, coatings, or overlays on garage floors, balconies, basements, hospital hallways, pool decks, and edges.

The specifications for the BP-9-SP:

*Production Capacity: Up to 450 sq. ft./hr.  
Blast Pattern: 9"  
Travel Speed: 2 to 80 ft. per min.  
Blast Motor: 4 hp  
Voltage: 230 volt single phase  
Amperage: 17 amps  
Minimum Generator: 15 kw  
Dimensions: 36"x12"x48"  
Weight: 318 lbs.  
Power Cord Length: 50 ft.  
Seals: Magnetic / Brushes  
Distance to edge: 1.5"  
Dust Collector: Required

Advantages over competitors:

- The equipment, as well as all wear parts, are made in the U.S.A. and there is typically no lead time when ordering parts.  
- The electrical box and electrical components are engineered and constructed by a UL508A control panel group.  
- The type w 12/3 electrical cord is the toughest and most wear resistant cord available.  
- 24 hour customer service
